## Experience

### • Techovarya Solutions , Vadodara

Nov 2022 - Present

Associate Software Engineer

In my role as a developer, I have extensive experience in creating responsive and user-friendly websites and mobile applications by leveraging the power of React.js and React Native. Working closely with cross-functional teams, including designers and backend developers, I have ensured the seamless integration of frontend components, resulting in cohesive and efficient applications. My expertise also includes integrating third-party libraries and APIs, guaranteeing a smooth flow of data and enhancing the overall functionality of the applications. I actively engage in code reviews, providing valuable feedback and adhering to coding standards to uphold the integrity of the codebase. My dedication to delivering high-quality products has consistently led to successful and satisfying user experiences.

### • Unacademy (Virtual)

[Jun 2022 - July 2022]

Summer Internship

During my tenure at Unacademy as a part-time team member, I successfully managed the task of fulfilling daily leads within specified deadlines. In this role, I demonstrated exceptional time management skills, ensuring that the lead generation process remained efficient and productive. Working collaboratively with the team, I consistently met and exceeded targets, contributing to the overall success of the organization.
